

Legal Architecture.

Legal precision in an algorithmic era.

Legal complexity demands architectural discipline

The legal sector operates in an environment where every formulation matters. W69 implements AI architecture for law firms, compliance departments and legal operations where precision and confidentiality are core. Contracts grow more complex, regulation changes faster, and clients expect real-time insight. Without architectural discipline, your knowledge advantage becomes your greatest vulnerability.

“You don’t merely manage a case file; you safeguard the legal integrity for the next generation of your clients.”

We don’t build for today’s case law, but for tomorrow’s legal certainty. Your practice deserves an architecture that stands the test of time.

Regulatory Intelligence

Real-time monitoring of laws and regulations with automated impact analysis.

Contract Logic

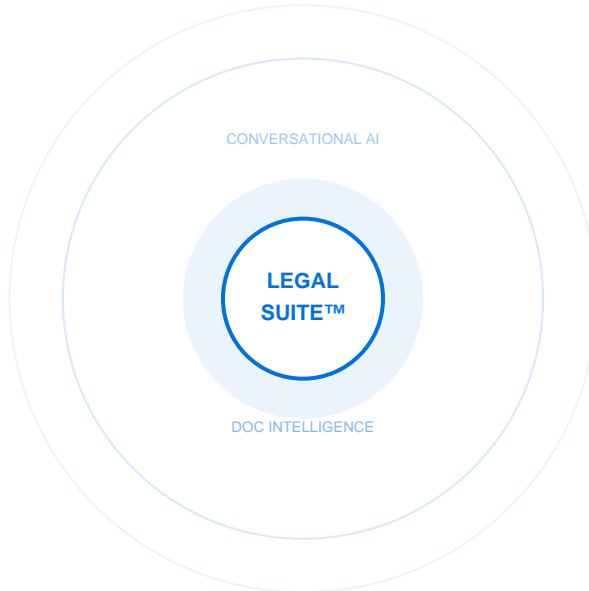

Intelligent contract analysis with clause extraction and risk identification.

Privacy-by-Design

Architecture that safeguards privacy and confidentiality as a core principle.

The Legal Suite™

How W69 connects AI components into one unified legal architecture.

- **Contract Engine**
Intelligent contract analysis with clause extraction, risk identification and comparison against standard terms.
- **Compliance**
Automated review against laws and regulations, from GDPR to sector-specific compliance requirements.
- **Legal Research AI**
Search case law, legislation and doctrine with semantic understanding and context-aware results.
- **Reporting**
Automated reports for clients, regulators and board members with full source referencing.
- **Audit Trail**
Complete traceability of every AI recommendation for disciplinary accountability.

Cross-cutting capabilities: Document Intelligence and Conversational AI are integrated across all components of the Legal Suite™.

From legal documents to strategic insight

AI that understands, analyses and transforms your legal document flow into actionable advice.

1 Contract & Due Diligence Analysis

Automatic extraction of key provisions, risk clauses and deviations from contracts, NDAs and due diligence packages.

2 Regulatory Document Screening

Real-time screening of legal documents against current laws and regulations with full audit trail and compliance reporting.

3 Legal Brief Automation

Generation of legal memoranda, opinions and procedural documents based on source material and case law.

Intelligent interaction for the legal practice

AI-driven conversations that guide clients, support lawyers and ensure compliance.

1 Client Intake Assistant

Automated client identification and case registration through natural conversations with real-time compliance checks and conflict screening.

2 Legal Knowledge Bot

AI assistant that gives lawyers direct access to relevant case law, legislation and internal knowledge bases via a conversational interface.

3 Compliance Helpdesk

Answer employee compliance questions in real time, with direct source referencing to policies, regulations and procedures.

From passive tools to autonomous intelligence

Static AI models wait for a prompt. **Agentic Systems** by W69 take the initiative. We design architectures in which AI agents autonomously plan tasks, consult sources, control tools and validate results.

1 Reasoning Engines

Chain-of-Thought protocols for legal analysis. From contract review to compliance audits, step by step and fully traceable.

2 Tool Augmentation

Integration with your existing Legal Tech stack. Whether it concerns document management systems, case management or legal databases.

3 Human-in-the-Loop

For critical legal decisions, the system escalates to your lawyers. No autonomy without professional accountability.

4 Continuous Learning

The architecture evolves with case law and regulation. Feedback loops refine the models within governance guardrails.

Your AI Readiness Score

The Navigator™ Assessment provides an initial indication of your organisation's AI maturity. Scores range from 10 to 50, distributed across three maturity levels.

Exploration

10 – 20

AI is in an early experimental phase. Individual experiments, few organisation-wide guidelines, fragmented tools.

Integration

20 – 35

AI is already applied in specific workflows. Concrete use cases, partial integration, growing team adoption, governance in development.

Strategic AI

35 – 50

AI is a structural part of the organisation. Organisation-wide adoption, integrated AI architecture, clear governance, AI-supported decision-making.

Start your Navigator™ Assessment

Discover your organisation's AI maturity in 5 minutes.
